NARRATOR VO

**A collection of the best
astronauts, representing 5
different continents;
America, Russia, China, the
Middle East and Africa come
together for the mission of
a lifetime. Their mission**

is to be the first human crew to land on Mars. The three-year journey to the red planet and back home would be tough physically and most certainly mentally and emotionally. They all sacrifice their families to make progress and history. These astronauts need to learn to have trust and faith in each other and work as a team to help them all survive.
